

**Jacques Lalevée, IS2M, UHA**

*Photopolymerization: state of the art and perspectives*

Jacques Lalevée is Professor in Physical Chemistry with an area of expertise in (photo)chemical reactivity and polymerization reactions (on large variety of (photo)polymeric materials, like UV-curable varnishes, paints, inks, adhesives, composites and 3D printing). He has published more than 500 papers in international peer reviewed journals and 30 patents.
